

Ameristar Furnace

FIELD APPLIED LABEL PLACEMENT

In just a few short weeks, our brand new Ameristar furnaces will begin arriving at our various distributor locations. We wanted to address one of the differences between these units and their predecessors – the label isn't on the unit!

LABEL APPLIED IN FIELD

- All Ameristar furnaces now come with the brand label located in the document package, which can be found inside the unit upon arrival.
- Each furnace will have markings to show where the label should be applied in order to make application simple, fast, and consistent.

These new furnace lines contain many great, new features that are sure to deliver desired comfort to homeowners year-round.

For more information about these new Ameristar furnaces, please visit AmeristarHVAC.com.
